LET US SAVE OUR WORLD FROM CANCER

UPROOTING THE
FEAR OF

Cancer

In this issue, Cancer Chronicle explores our holistic approach, shares stories of resilience, and highlights how our commitment to care is transforming lives across India. We're honored to support you on this journey to healing.

➔ Victory Over Cancer: A New Chapter

Mrs. Geetha V.E.
Breast cancer
fighter

The doctors, dietitians, and team at DSRC Bengaluru were wonderful. They helped me not only survive but thrive again. My health is better, and my confidence is restored. D.S. Research Centre is truly a blessing.

➔ Stronger Than Ever: Life After Cancer

Prashant Lakra, a brain cancer survivor, has been leading a healthy and normal life for over 18 years.

When I was diagnosed with brain cancer, it felt like the end. But D.S. Research Centre gave me the strength and support I needed to fight. Their approach helped me find resilience and hope, and today, I'm proud to say I'm a survivor. Cancer can be beaten, and I'm living proof of that.

➔ Hope is Real, Healing is Possible:

Ratna Chatterjee, an esophageal cancer survivor, is leading a normal and happy life over 15 years after her diagnosis

Fifteen years ago, I was diagnosed with esophageal cancer—a journey I never expected. Today, I am leading a normal, healthy life, grateful every day for the strength and support that helped me overcome something so rare. Cancer may be daunting, but with the right care and resilience, survival is truly possible.

Cancer can be overwhelming, leaving many unsure where to turn for compassionate, effective treatment. At D.S. Research Centre, we've dedicated over 65 years to pioneering integrative cancer care through our Nutrient Energy Therapy (NET). This unique approach combines Ayurvedic wisdom with modern approach, offering renewed hope for even advanced cases.

Proof of Strength

Bhaskar Banerjee, Buccal Mucosa Cancer Fighter

As someone who explored every treatment option, I was genuinely amazed by my results at DSRC Kolkata. Their holistic, Ayurvedic approach worked with my body's natural healing process, helping me regain strength without the harsh side effects. I am grateful for this compassionate, effective care.

Living Proof of Resilience

Mita Oza Cancer Fighter

In a few words, it's truly magical. DSRC's Ayurveda medicines helped me endure chemotherapy with less intense side effects. It's been over a year and a half on DSRC treatment, and I've been off all allopathy for over a year with clear reports. Grateful to the DSRC team for their support.

Dr. Shibangi Das, Ayurvedacharya at D.S. Research Centre, shares that dealing with advanced cancer and its complications requires a strategic, holistic approach. Nutrient Energy Therapy (NET) based on ancient Ayurvedic principles, focusing on enhancing immunity and managing symptoms to slow disease progression.

According to Dr. Das, a blend of personalized diet, lifestyle guidance, and herbal support helps stabilize the body, alleviates side effects, and improves quality of life, providing patients with strength and clarity to face each phase.

After my mastectomy, I was introduced to D.S. Research Centre by a former dietitian, and it was the best decision I made. Under Dr. Geetanjali's care at the Bangalore branch, I received personalized treatment that kept me strong throughout my recovery, despite the usual side effects. Their holistic approach gave me not just physical healing, but emotional support as well. I'm grateful for the compassionate care I received, and I now recommend D.S. Research Centre to anyone facing cancer. There is hope, and I'm living proof of that.

Breast Cancer Metastatic
Survivor**

THE TRANSFORMATIVE POWER OF DIET IN CANCER TREATMENT

Diet plays a crucial role in the cancer journey, often underestimated yet vital. As a Clinical Dietitian at D.S. Research Centre, Hyderabad, I've seen firsthand how nutritional support can enhance patients' experiences during treatment and improve their quality of life. Nutrition is more than sustenance; it complements medical treatments, boosting strength, immunity, and resilience.

Our personalized dietary approach nourishes the body, minimizes treatment side effects, and supports natural healing. Coupled with therapies like Nutrient Energy Therapy, a tailored diet reduces fatigue, enhances immune function, and manages treatment-related symptoms.

At D.S. Research Centre, we align each patient's dietary needs with their medical treatment, maximizing care effectiveness. We are committed to guiding patients and families in understanding nutrition's vital role, redefining cancer care, and empowering patients throughout their healing journey.
